SOP: Creating Effective Parish Flyers

Parish Media Company | Content Production

Objective

Create professional, authentic parish flyers that grab attention and drive action using ChatGPT, real parish photography, and Canva.

Core Principle: AI should assist the creative process, not replace it. Every flyer should incorporate human creativity and editing to avoid generic, AI-generated designs.

Build the Creative (PACT Framework)

P = Pattern | Start with a Reference

- Find an existing flyer with a strong layout or style.
- Upload it to ChatGPT and ask it to follow the design direction.
- Avoid generating flyers without a reference, as AI tends to produce generic designs.

A = Authenticity | Incorporate Real Photos

- Upload actual photos of the pastor, parishioners, speakers, church, or event.
- Choose imagery that communicates what the event is about at a glance.
- Preserve the original appearance of real people and locations.

C = Convert | Bring into Canva

- Generate the initial design in ChatGPT, then import it into Canva.
- Use Canva's Magic Layers to separate elements for editing.
- Reposition, resize, or replace elements as needed.

T = Tweak | Add the Human Touch

- Fix spacing, typography, and awkward design elements.
- Remove unnecessary arrows, decorations, and other AI-looking details.
- Keep the design clean, original, and easy to read.

Write the Copy (COPY Framework)

Every flyer must answer four questions, in this order:

1. C = Callout: Who is this for?

- Clearly identify the intended audience.
- Example: "Catholic Parents in Melbourne & the Beaches!"

2. O = One-Line Why: Why should they care?

- Write one compelling sentence explaining the benefit of attending or participating.
- Example: "Discover a school where faith and academic excellence come together."

3. P = Place & Time: When and where is it?

- Include only the essential date, time, and location.
- Example: "November 12 | 10 AM | Holy Name of Jesus"

4. Y = Your Action: What should they do next?

- Include a clear, prominent call to action.
- Example: "Click to Learn More & Register"

Important: Keep the copy minimal. Additional information belongs in the social media caption, bulletin, or website, not crammed onto the flyer.

Golden Rule

A flyer is an advertisement, not an info-document. Its job is to get the right person to stop scrolling or flipping, understand why they should care, and take action.
